

The Airrex HSC-24R is a powerful portable spot cooler designed to tackle larger heat loads and tougher environments. With high cooling capacity and focused air delivery, it's ideal for keeping people and equipment comfortable in server rooms, manufacturing areas, warehouses, event spaces, and temporary job sites.

Mounted on heavy-duty casters, the HSC-24R rolls easily into position and sets up quickly, delivering cool air right where it's needed most. Adjustable discharge allows you to target hot spots, critical machinery, or workstations, helping reduce downtime and protect sensitive equipment from overheating.

Built for demanding commercial and industrial use, the Airrex HSC-24R combines rugged construction with straightforward, user-friendly controls. Whether you need supplemental cooling, a rental solution, or emergency backup, it provides dependable, efficient performance you can count on project after project.

Technical Specifications

Cooling Capacity	24,000 BTU
Coverage Area	Up to 1,000 sq. ft.
Power Supply	1ph / 220v / 60Hz or 3ph / 480V/ 60 Hz
Air Flow (CFM, H/L)	650 CFM (High) / 580 CFM (Low)
Operating Range	65°F - 113°F
NEMA Plug	NEMA 6-20 or Hardwire
Dimensions	19.3 x 23.6 x 49.8
Weight	190 lb
Refrigerant	R-454B (Low GWP)
