

The Airrex HSC-36R is a rugged, high-capacity spot cooler built to handle serious heat loads in demanding environments. Designed for larger spaces and critical applications, it delivers powerful, focused cooling ideal for manufacturing areas, warehouses, data rooms, event spaces, and industrial job sites.

Despite its output, the HSC-36R remains fully portable. Heavy-duty casters and a compact, upright design make it easy to move into position and set up quickly, so you can get cool air exactly where it's needed—over hot equipment, production lines, or occupied work zones.

Engineered for continuous commercial and industrial duty, the Airrex HSC-36R features durable construction, straightforward controls, and efficient operation suited for both rental fleets and permanent installations. When high heat is threatening comfort, productivity, or equipment uptime, the HSC-36R provides dependable, high-performance spot cooling you can count on.

Technical Specifications

Cooling Capacity	36,000 BTU
Coverage Area	Up to 1,200 sq. ft.
Power Supply	220V 1-Phase 60Hz
Amps	27.3
Air Flow (CFM, H/L)	943 CFM
Operating Range	68°F - 113°F
Dimensions	19.3 x 23.6 x 49.8
Weight	452 lbs
Refrigerant	R-454B
