

The Airrex HSC-18R is a versatile mid-size spot cooler designed to take control of hot spots before they become a problem. Perfect for server rooms, production lines, warehouses, offices, and temporary work areas, it delivers focused cooling where central HVAC struggles or can't reach.

Featuring a compact footprint and heavy-duty casters, the HSC-18R moves easily around your facility and sets up in minutes. Directional discharge lets you aim cool air directly at equipment, workstations, or problem areas, helping protect sensitive electronics, improve comfort, and reduce heat-related downtime.

Built for continuous commercial and industrial use, the Airrex HSC-18R combines rugged construction with simple, intuitive controls and efficient operation. It's an ideal choice for supplemental cooling, rental fleets, and emergency backup when you need reliable performance in a portable package.

## Technical Specifications

Cooling Capacity	16,800 BTU
Coverage Area	Up to 600 sq. ft.
Power Supply	115V / 60Hz / 20 amps
Air Flow (CFM, H/L)	460 CFM (High) / 400 CFM (Low)
Operating Range	65°F - 113°F
NEMA Plug	NEMA 5-20
Dimensions	19.3 x 23.6 x 49.8
Weight	185 lb
Refrigerant	R-454B (Low GWP)
