

1.4 Mil IDF HEATER

This 1.4 million BTU skid-mounted indirect-fired heater delivers serious heating power for large industrial, commercial, and construction applications. Designed for permanent or semi-permanent setups, it's ideal for big jobsites, plants, warehouses, process areas, and large temporary structures that demand reliable, high-volume heat.

As an indirect-fired unit, combustion is contained within a sealed heat exchanger, so only clean, fume-free air is supplied to the space—making it suitable for occupied areas, finish construction, and sensitive materials. The skid-mounted design allows easy placement with a forklift or crane and integrates well with ductwork, manifolds, and fuel systems for centralized, multi-zone distribution. Rugged construction, simple controls, and robust safety features make this 1.4 million BTU heater a dependable solution for high-demand, long-duration heating projects.

Technical Specifications

Type	Heater IDF
BTU	1,400,000
CFM	7,000
Power Supply	240V / 3ph / 60Hz or 480V / 3ph / 60Hz
Discharge Duct	20"
Temp rise from 0°F	200
Fuel Type	Natural Gas / Liquid Propane / Diesel Fuel
Dimensions	176" x 88" x 88" (L x W x H)
Weight	7,320 lbs
