

4.2 Mil IDF HEATER

This 4.2 million BTU skid-mounted indirect-fired heater delivers utility-scale, high-output heat for the largest industrial, commercial, and construction projects. Designed for continuous operation in demanding environments, it's ideal for plants, major construction sites, large warehouses, process areas, and expansive temporary structures where consistent, controlled heat is critical.

With its indirect-fired design, all combustion is contained within a sealed heat exchanger, so only clean, fume-free air is delivered into the space—making it suitable for occupied areas, finish work, and sensitive materials. The heavy-duty skid platform allows easy placement with a forklift or crane and integrates seamlessly with ductwork, manifolds, and central fuel systems for multi-zone distribution. Rugged construction, straightforward controls, and robust safety features make this 4.2 million BTU heater a dependable solution for large-scale, mission-critical heating applications.

Technical Specifications

Type	Heater IDF
BTU	4,200,000
CFM	21,000
Power Supply	240V / 3ph / 60Hz or 480V / 3ph / 60Hz
Discharge Duct	32"
Temp rise from 0°F	200
Fuel Type	Natural Gas / Liquid Propane / Diesel Fuel
Dimensions	384" x 95" x 114" (L x W x H)
Weight	19,310 lbs
