

# 700K IDF HEATER

This 700,000 BTU towable indirect-fired heater delivers powerful, clean, and dry heat for large jobsites and events. Built on a rugged trailer, it's easy to move and position, making it ideal for construction projects, industrial facilities, restoration work, and large tents or temporary structures.

Because it's indirect-fired, combustion stays sealed inside the heat exchanger, so only fume-free, heated air is delivered into the space—perfect for occupied or sensitive areas. Multiple duct outlets allow you to distribute heat to several zones or long runs, while straightforward controls and robust safety features make it user-friendly for crews and rental applications. This 700K unit is a dependable choice when you need serious, portable heating capacity in tough conditions.

## Technical Specifications

Type	Heater IDF
BTU	700,000
CFM	3,000
Power Supply	240V / 3ph / 60Hz or 480V / 3ph / 60Hz
Discharge Duct	16"
Temp rise from 0°F	200
Fuel Type	Natural Gas / Liquid Propane / Diesel Fuel
Dimensions	97" x 72" x 82" (L x W x H)
Weight	4,7000 lbs
