

This 2.4 million BTU skid-mounted indirect-fired heater delivers extremely high-output, clean heat for large industrial, commercial, and construction projects. Built for demanding environments and long run times, it's ideal for big plants, large warehouses, major construction sites, process areas, and expansive temporary structures that require consistent, high-volume heating.

With indirect-fired design, all combustion stays contained within a sealed heat exchanger, so only clean, fume-free air enters the space—ideal for occupied areas, finish work, and sensitive materials. The skid-mounted package is easy to place with a forklift or crane and integrates smoothly with ductwork, manifolds, and central fuel systems for multi-zone distribution. Rugged construction, straightforward controls, and comprehensive safety features make this 2.4 million BTU unit a reliable choice for large-scale, mission-critical heating applications.

Technical Specifications

Type	Heater IDF
BTU	2,400,000
CFM	11,000
Power Supply	240V / 3ph / 60Hz or 480V / 3ph / 60Hz
Discharge Duct	24"
Temp rise from 0°F	200
Fuel Type	Natural Gas / Liquid Propane / Diesel Fuel
Dimensions	225" x 96" x 133" (L x W x H)
Weight	8,200 lbs
