

# 500K IDF HEATER

This 500,000 BTU indirect-fired heater delivers powerful, clean, and dry heat for construction sites, industrial facilities, and large temporary spaces. Similar in application to the Heatstar 400ID, it's built for tough conditions with a rugged housing, high static blower, and simple, reliable controls that crews can operate with confidence.

Because it's indirect-fired, combustion stays sealed inside the heat exchanger, so only fume-free, heated air is supplied to the space—ideal for enclosed or occupied areas, finish work, restoration, and tent heating. Duct connections allow you to direct heat exactly where it's needed or feed multiple zones from a single unit. This 500K heater is a strong choice when you need dependable, mid-to-high capacity heat and professional-grade performance.

## Technical Specifications

Type	Heater IDF
BTU	500,000
CFM	2,500
Power Supply	120V / 1phase / 60Hz
Discharge Duct	(2) 12"
Temp rise from 0°F	200
Fuel Type	Natural Gas / Liquid Propane / Diesel Fuel
Dimensions	68" x 27" x 60" (L x W x H)
Weight	473 lbs
