

25-ton temporary air conditioner delivers powerful, reliable cooling for large commercial and industrial spaces. Designed for fast deployment and flexible use, it's ideal for construction sites, warehouses, manufacturing areas, events, and emergency backup when your main system can't keep up or goes down.

Mounted for easy transport and connection, this unit ties into your existing ductwork or can be used with flexible duct to target specific zones or problem areas. Rugged construction, straightforward controls, and efficient operation make it a practical choice for rental applications and short- or long-term projects where dependable, high-capacity cooling is critical.

Technical Specifications

Cooling Capacity	270,000 BTU
Coverage Area	Up to 9,600 sq. ft.
Power Supply	460V 3-Phase
Amps	80
Plug Type	Hardwired Connection (Cam Locks 2AWG)
Air Flow (CFM, H/L)	9,500 CFM
Operating Range	45°F - 105°F
Dimensions	60" x 66" x 60 3/8 " (WxDxH)
Weight	2030 lbs
