

This 15-ton temporary air conditioner provides dependable, high-output cooling for medium to large spaces where comfort and equipment protection are critical. Ideal for construction sites, warehouses, manufacturing areas, tents, events, and emergency backup, it's sized to handle significant heat loads without the footprint of a larger unit.

Designed for fast setup and flexible use, the 15-ton unit can connect to existing ductwork or use flexible ducts to target specific zones, hot spots, or problem areas. Rugged construction, simple controls, and efficient operation make it a smart choice for rentals and short- or long-term projects that need reliable, portable climate control.

Technical Specifications

Cooling Capacity	180,000 BTU
Coverage Area	Up to 6,000 sq. ft.
Power Supply	460V 3-Phase
Amps	60
Plug Type	Hardwired Connection
Air Flow (CFM, H/L)	5,000 CFM
Operating Range	45°F - 105°F
Dimensions	66" x 96" x 96 " (WxDxH)
Weight	4000 lbs
Refrigerant	R-454B (Low GWP)
